

The ability to make the right decisions!

HSE (HEALTH SAFETY & ENVIRONMENT)

By applying quality management system, including environmental, occupational and health safety, Omac Integrated aimed to constantly improve the effectiveness of the HSE system. This will ultimately have a positive effect on all aspects of quality, work safety and environment protection.

The company is certified according to ISO9001-2009, ISO 14001-2006 and OHSAS 18001-2008 standards

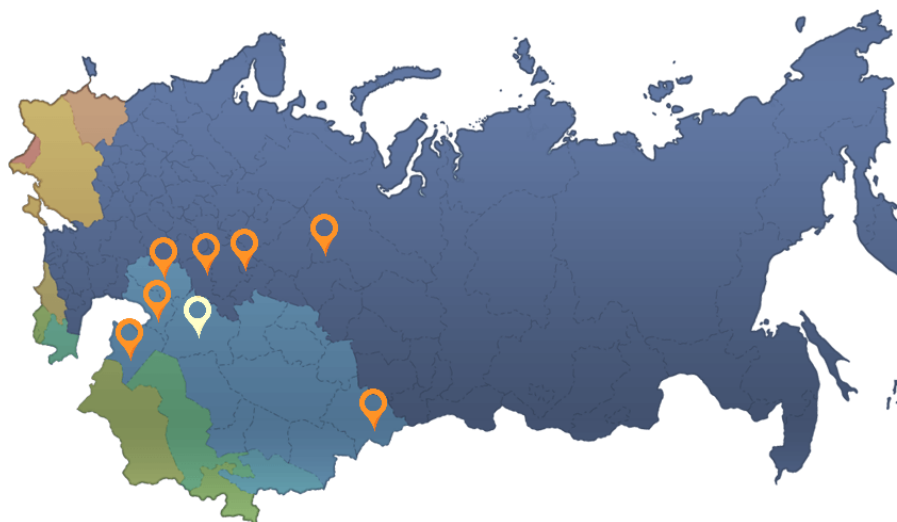

**NO ANY LOST TIME ACCIDENTS OR INCIDENTS
OCCURRED IN COMPANY ENTIRE HISTORY**

COMPANY ESTABLISHED IN 2003. OPERATIONAL STAFF > 200 PEOPLE.

 -Company's headquarter

 - branches and warehouses of the company

Aktobe:

Open warehouse - 3 000 m²
Indoor Warehouse - 1 500 m²

Uralsk:

Open warehouse - 1000 m²
Indoor Warehouse - 800 m²

Atyrau:

Open warehouse -800 m² Open warehouse - 1 000 m²
Indoor Warehouse - 400 m² Indoor Warehouse - 700 m²

Aktau:

Semei:

Indoor Warehouse - 400 m²

Buzuluk, Russia:

Open warehouse - 3 000 m²
Indoor Warehouse - 1 500 m²

Samara, Russia:

Open warehouse -2000 m²
Indoor Warehouse - 1500 m²

Ufa, Russia:

Open warehouse -2000 m²
Indoor Warehouse - 1300 m²

Nijnevartovsk, Russia:

Open warehouse -4000 m²
Indoor Warehouse - 2000 m²

Omac Integrated is an Independent 100% Kazakhstan Company
Certified to ISO9001, ISO14001 and OHSAS18001.

**18
YEARS**

in the oil business

**>4000
WELLS**

successfully

**>7.1M
METERS**

drilled by using
our technologies
and support
services

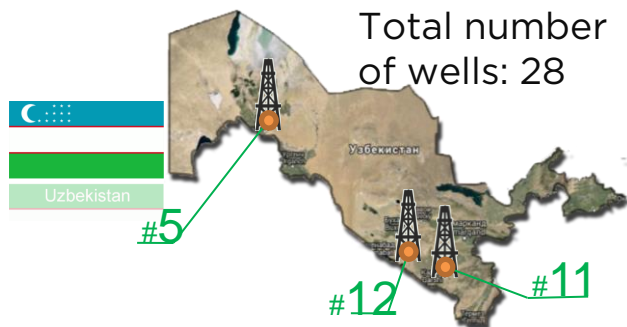

Total number of wells: 1545

Total number of wells: 2485

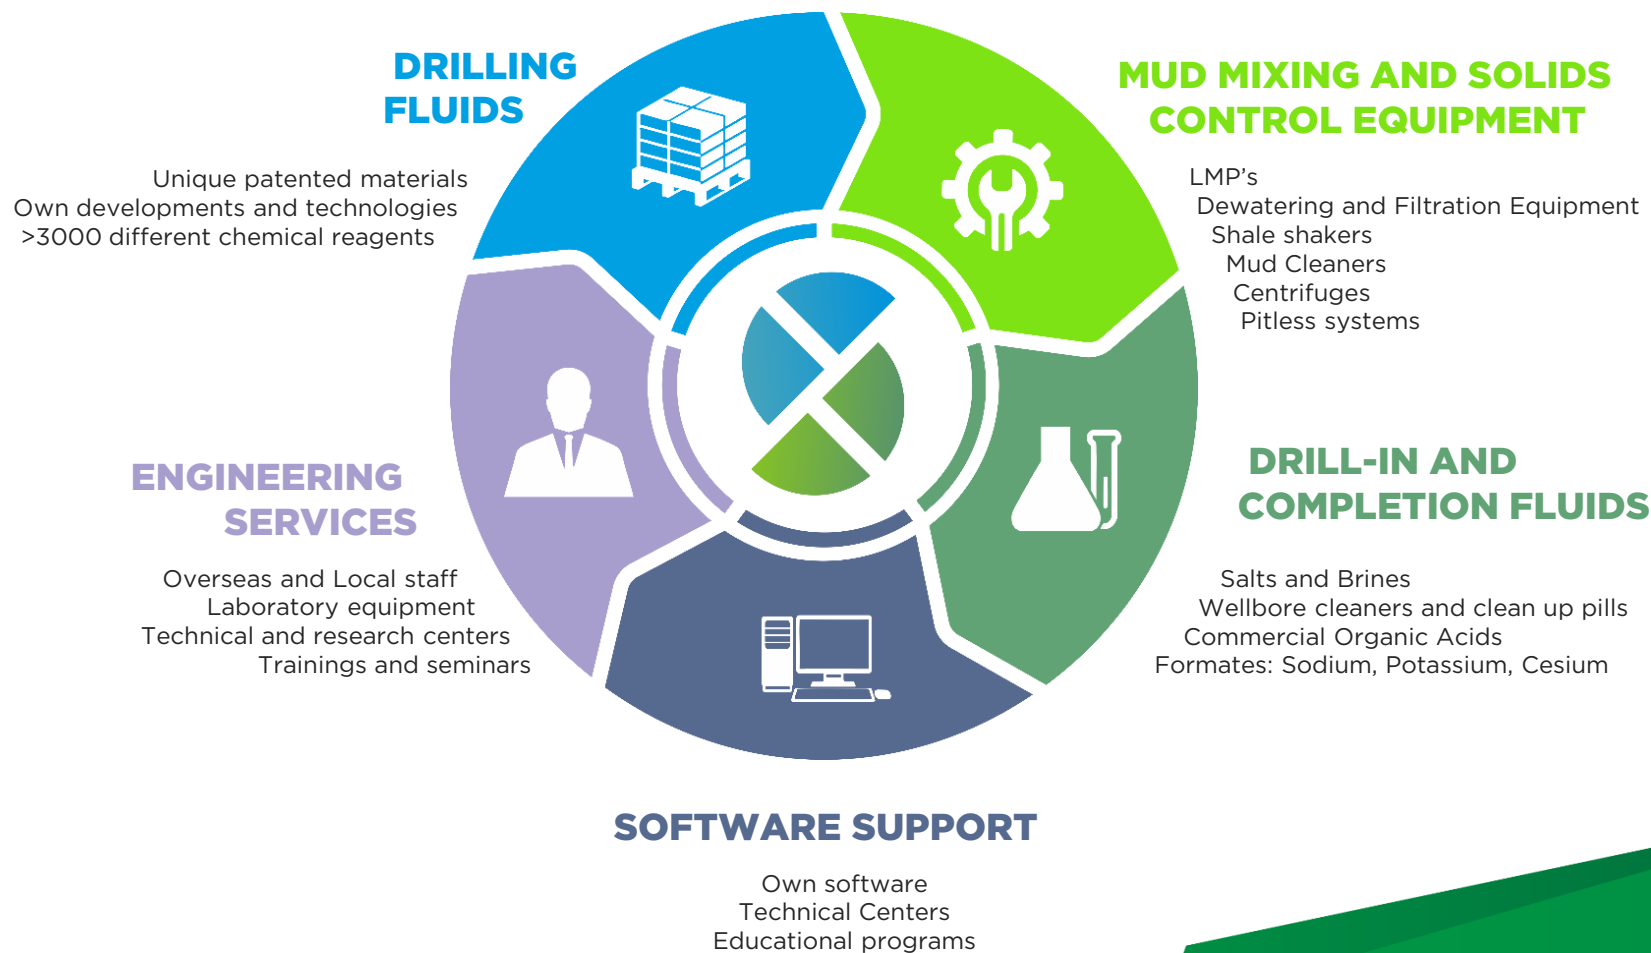

Total number of wells: 28

03 TYPE OF SERVICES

THE ABILITY TO MAKE THE RIGHT DECISIONS!

www.omac-int.com

- ✓ Own proven systems, technologies, developments, regional experience.
- ✓ Scientific laboratory researches (core, cutting, cement, hydrocarbon and others analysis)
- ✓ Closed loop pitless system
- ✓ Software support (OmacPro, Sysdrill Hydraulics, HydPRO, SurgeMOD)
- ✓ Training of the client's personnel in international accredited centers Dubai, Kuala-Lumpur, Istanbul, etc.
- ✓ Support of the National Development Bank of Kazakhstan and the national program "Kazakh Export"
- ✓ Digitalization of drilling processes (the own center for collecting / processing information(OmacPro DataCenter)

QUALITY ASSURANCE/QUALITY CONTROL

Omac activity is focused on the quality of the products supplied.

All materials pass the entrance quality control according to specification API 13A, OCMA.

In our own, and affiliated laboratory facilities, we test all production samples prior to shipment.

All work is carried out in accordance with ISO9001-2009, ISO 14001-2006 and OHSAS 18001-2008 standards.

OmacPro – is OMAC own mud reporting software

OmacPro – is software for drilling fluid data collection, classification and analysis. The program was developed to automate calculations of production processes during drilling, compiling daily reports on drilling fluids and their analysis, accounting chemical reagents and operating time of the solids control equipment. OmacPro automatically calculates the cost of the well, compares the current and planned mud parameters. All calculations are carried out in accordance with international standards.

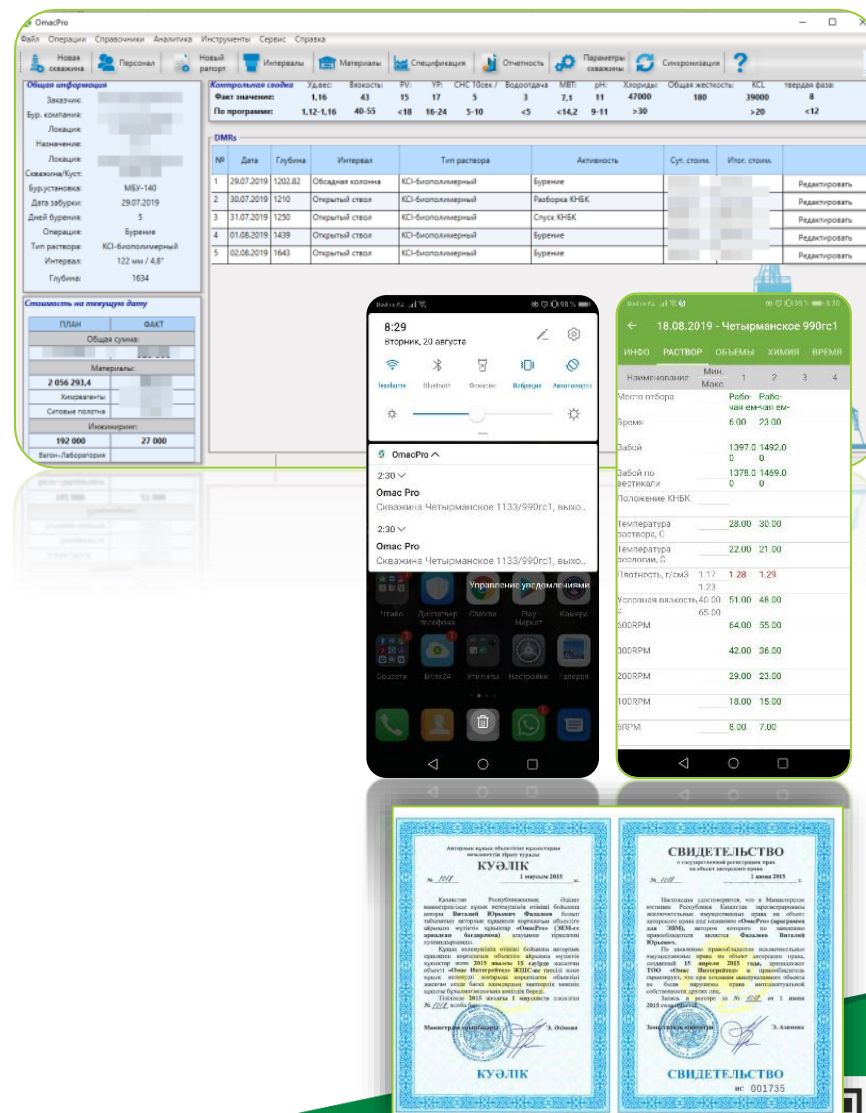

09 OMACPRO. ADVANTAGES

THE ABILITY TO MAKE THE RIGHT DECISIONS!

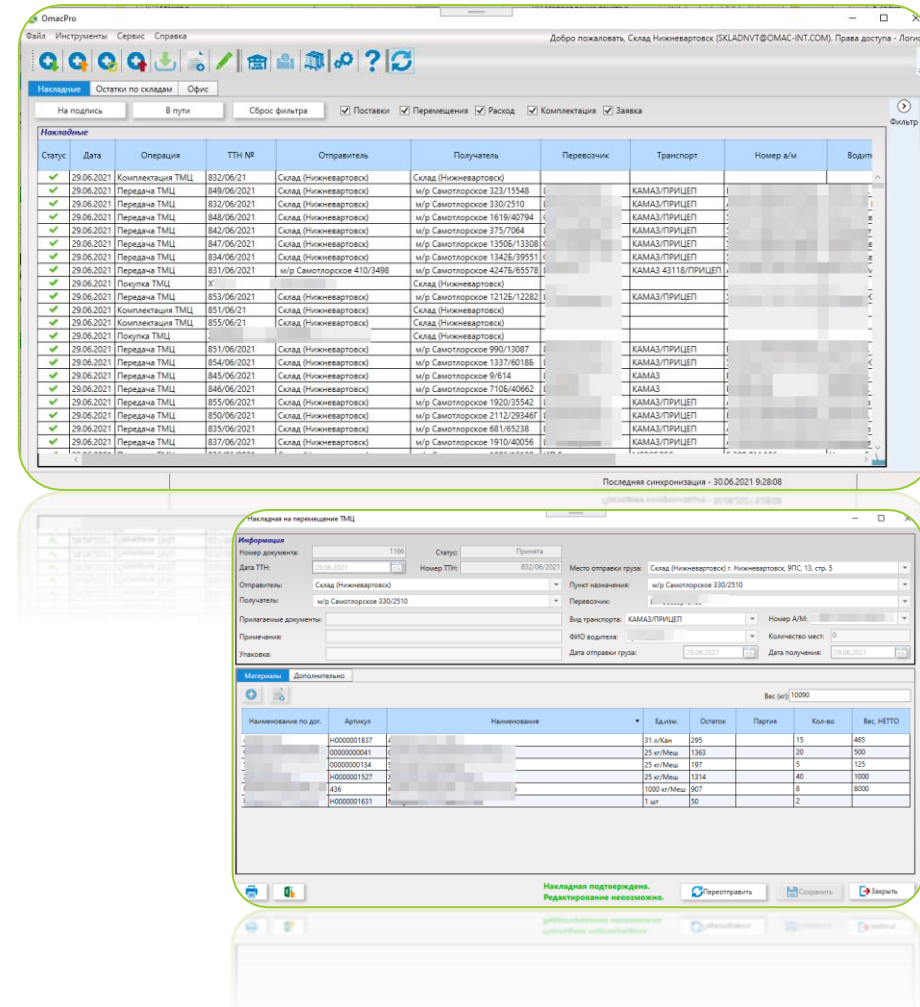

- The company's intellectual property taking into account the specifics and nuances of the oil and gas industry in the region;
- Designed based on the rich experience of the company;
- Continuous development and addition of new functions and calculations;
- Optimization of processes during drilling;
- Easy and quick implementation of innovative methods with full control of all aspects of drilling;
- Providing full information on all active wells of the Customer in real time - Online;
- The ability to add additional reports at the request of the Customer;
- Conducting of calculations and reporting in the Si or API system;
- **Mobile App for iOS and Android;**
- **Mobile PUSH notification;**
- Rapid notification of changes in the drilling process;
- The ability to integrate with the measuring equipment of the GTI, connection to external servers and databases for monitoring selected data.

www.omac-int.com

- 100% own development of Warehouse Management System with taking into account all the nuances of fluids service;
- Offline, online and mixed work;
- Full control and transparency of the movement materials;
- Minimization of the human factor and random mistakes;
- Decentralized data storage system;
- Possibility to install logic on the customer's server;
- Ease of use and intuitive interface;
- Unlimited expansion possibilities software package at the request of the customer;
- Full integration with OmacPro in the fields;
- Scalable and flexible analytics system;
- Visualization of demand and turnover at wells/branches;
- Optimization of interaction between departments involved in the turnover of goods and materials (purchasing department, sales department, logistics, accounting, management);

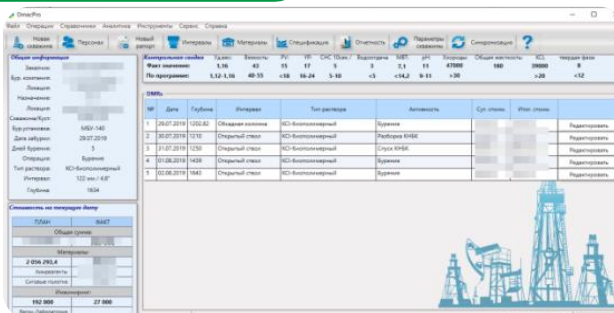

DIGITALIZATION

- the formation of own center for collecting / processing information

ИСКУССТВО ПРИНИМАТЬ ПРАВИЛЬНЫЕ РЕШЕНИЯ!

Drilling process

№	Дата	Глубина	Всплеск	Тип раствора	Активность	Сум. время	Итого время

4	01.08.2018	140.00	Открытый ствол	Водяной раствор	Водяной	0:00	0:00
5	02.08.2018	140.00	Открытый ствол	Водяной раствор	Водяной	0:00	0:00

OmacPro

Customer office

Engineering

Drilling fluid

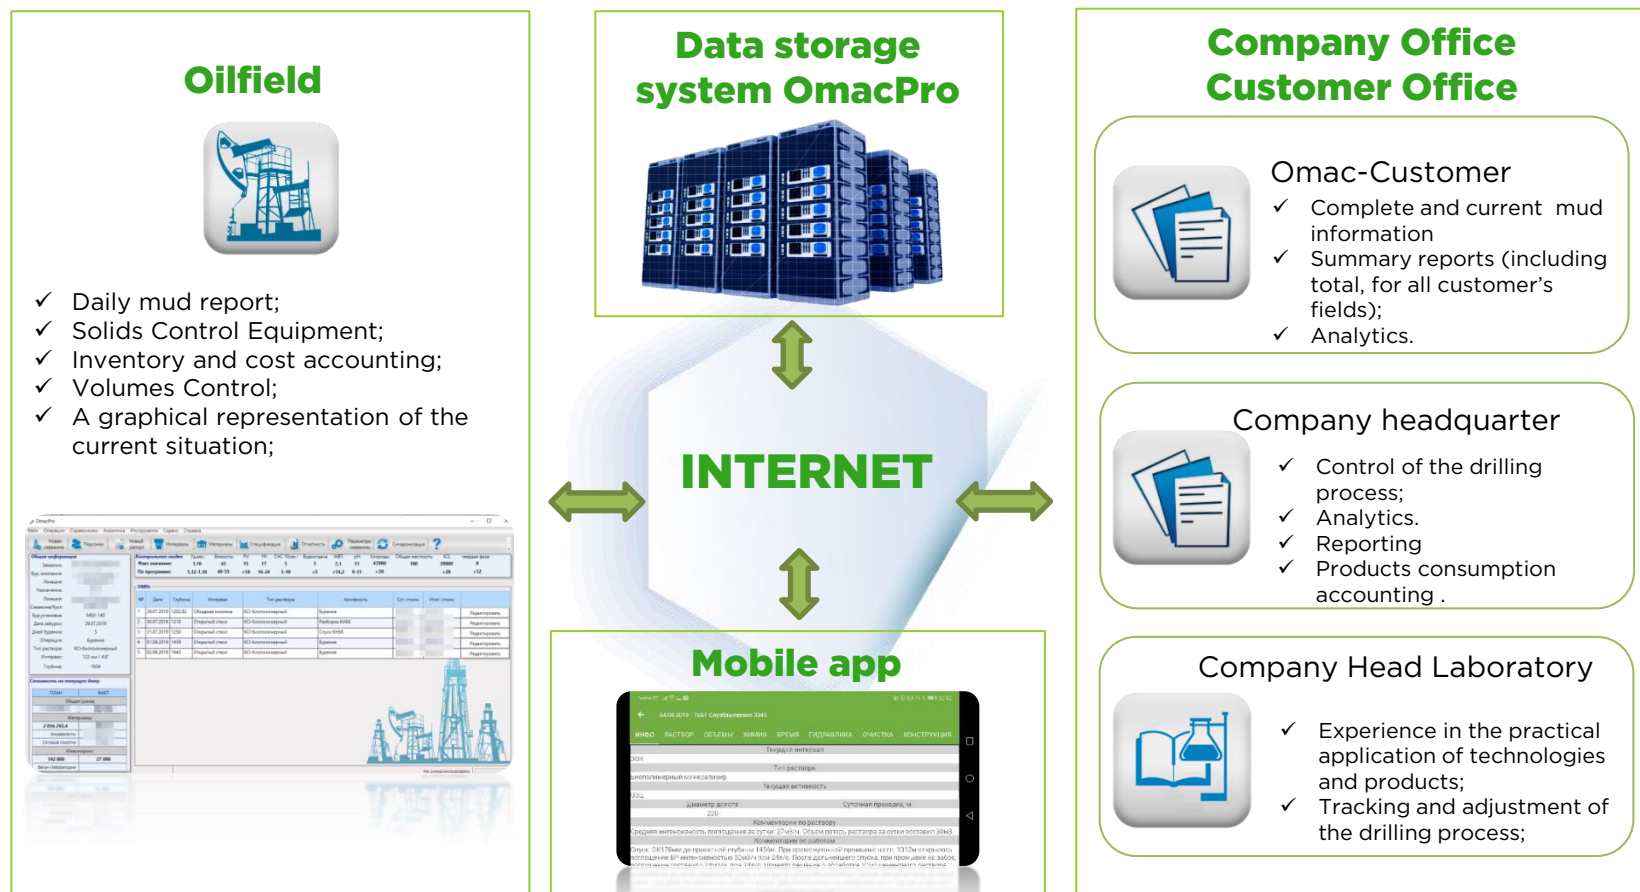

MudPlant

Drilling fluid control and preparation

DIGITALIZATION

- the formation of own center for collecting / processing information

* Omac Pro retains functionality without the Internet.
But, in this case, synchronization, remote viewing of data is not available.

11 DEVELOPMENT PROSPECTS

THE ABILITY TO MAKE THE RIGHT DECISIONS!

INTERACTION WITH 3D-PARTY SOFTWARE

Interoperability and integration with other drilling software

FLEXIBLE REPORTING SYSTEM

Selection and personalization of analytical and daily reports for the needs of a specific project

INTEGRATION WITH MUD LOGGERS PROGRAM

The ability to connect real-time sensors for monitoring and analyzing drilling parameters

ANALYSIS OF PARAMETER CHANGES

Analyzing data for inconsistencies or deviations. PUSH messages to all responsible persons. Flexible configuration of notifications for all available drilling parameters
